

## eRATEX 1.7 FEATURE LIST

- **Generic Cybersource Error Message provides no indication of what caused the problem**
  - Description of the error now displays in addition to the numeric code
- **AR Charge Order with Pre-Order item doesn't save payment amount or student ID**
  - Payment amount, account number and student ID now passing correctly
- **Online order receipts showing incorrect ISBN for ebooks**
  - Ebook sku now appears on Order Confirmation, Order History, and emailed receipt
- **Apply Shipping method is confusing for customers**
  - During checkout, customers no longer have to press the Apply Shipping Method button if the RATEX.ShippingMethod.AutSubmitSelection setting is enabled
- **Guided Navigation isn't fully compatible with eRatex**
  - Conflicts with Search/Hide Textbooks resolved
- **Remove Substitution Option on account page if disabled**
  - Customers were still able to set substitution preferences from their account page despite it being disabled on course pages
- **Pre order default selection (IT 68848)**
  - Stores can now set the default to Required Only or All
- **Greying out a variant when the stock is below the purchase threshold**
  - Users only learned a variant was out of stock after selection. Now indicated on drop-down
- **Invalid Product SENAME when using UseLegacySENameProvider**
  - Resolves runtime error that appeared when products having names beginning with unusual characters were selected from search results
- **Null cart**
  - Resolves potential for duplicate charge when items fail to load to cart properly and customer tries again which results in a second cart
- **Make Date/Time Field bigger/wider in Promotion Manager**
  - No more having to guess what you typed!
