Modernization update
03/19/2020 - Q&A

QUESTION: Can you have several tabs opened in different modules at the same time?

As a web-based program, you do have the ability to open modules into different tabs. We still have to explore and test having the same module open in different tabs. It is something we continue to review and test.

QUESTION: Is there going to be the ability to auto-populate after entering ISBN?

This is on our list of things to research, and we agree it would provide time-saving benefits to the user.

QUESTION: What do reports export as?

We have yet to build out reporting in modernization. At this time reporting comes from Core and can be exported as PDF, CSV and Excel. Reporting is a module we continue to research.

QUESTION: Is there an upload capability for item creation or batch edits?

We have the ability to batch edit items within the Modernized platform and are continuing to add batch-editing capabilities throughout. Import and upload functionality is a consistent request we have heard from our internal and external customers. We have begun creating designs and workflows for this functionality, but it is not yet in development. Our goal is to have a very flexible tool which makes that process easy for our clients.

QUESTION: Can you pull data from the Buyer's Guide?

As mentioned above, we have yet to build the data integration tools within Modernization. Integration to multiple buyers guide is on our requested feature list and will be incorporated.

QUESTION: Can the font be increased on some of these screens?

As a web-based product, you have the ability to use internet browser functionality to increase or decrease font and view sizes.
